

Capacitor Run Motor

Capacitor run motors are designed to power air conditioners and ventilation equipment. These motors come in various models with different voltage, frequency, current, and power specifications.

Product Overview

High-Performance Capacitor Run Motors

These capacitor run motors are engineered specifically for ventilation and HVAC applications, offering reliable performance for residential, commercial, and industrial equipment. Built with a focus on durability and efficiency, the series features insulation class B construction to ensure long-lasting operation in demanding environments. Each unit is designed to meet rigorous standards, with options available for various voltage and frequency requirements to suit global market needs.

Technical Specifications

Customization

- Voltage
- Frequency
- Shaft elongation

Insulation Level	Class B
Voltage Range	100V, 110V-120V, 220V-240V, 230V
Frequency	50Hz, 60Hz

Performance Metrics

Operating Range

35 W Min Input Power	350 W Max Input Power	0.14 A Min Current	3.5 A Max Current
--------------------------------	---------------------------------	------------------------------	-----------------------------

Model Data

Sample Model Specifications

Model	Voltage (V)	Freq (Hz)	Power (W)
YSY-7113-001	220-240	50	35
YSY-7113-002	110-120	60	44
YSZ-7112-001	220-240	50	40
YSZ-7117-004	110-120	60	53
