

Capsule-Based Coffee Brewing Machine

This coffee maker utilizes a capsule-based system for brewing. It features dry heating protection, a removable coffee basket and filter for easy cleaning, and a capacity of 2 to 6 cups.

Product Overview

Compact Capsule-Based Brewing

This capsule-based coffee brewing machine is designed for efficiency and convenience, making it an ideal choice for homes, offices, or personal use. Featuring a durable construction with high-quality imported PP plastic, it ensures both safety and longevity. With a flexible capacity ranging from 2 to 6 cups, it adapts easily to your daily brewing needs while maintaining a user-friendly interface.
