

Capsule Espresso Machine

This capsule espresso machine features a stable puncture system and delivers 5-7 bar high-pressure steam. It is equipped with water alarm and automatic cleaning prompt functions, as well as multiple security protection features.

Product Overview

Professional Capsule Brewing

This compact capsule espresso machine is designed for efficient, single-serve coffee brewing in professional or home environments. It utilizes a stable puncture system and high-pressure steam quenching to deliver consistent, high-quality coffee. With automated features like water alarms and self-cleaning prompts, it ensures ease of use and maintenance for busy users.

Technical Specifications

Brewing Pressure

5 bar

Minimum Pressure

7 bar

Maximum Pressure

Power Consumption

1200 W
