

Capsule Pressure Gauge 0-100 mbar, Class 1.6

This precision capsule pressure gauge is designed for accurate measurement of low pressures. It features a robust construction with a brass connection and a clear, easy-to-read dial.

Overview

Precision Low Pressure Monitoring

This capsule pressure gauge is engineered for high-precision measurement in low-pressure environments. Its robust construction makes it ideal for testing natural gas systems and other low-pressure applications. Compliant with EN 837-3 standards, it ensures reliable and accurate performance for industrial professionals.

Technical Specifications

Measurement Range

100 mbar

Max Pressure

Typical Applications

- Natural gas testing
- Low pressure monitoring
- Industrial pressure sensitive systems

Accuracy Class

CL 1.6

Standards Compliance

EN 837-3
