

Car Alarm System Remote Control

Remote control designed for car alarm systems. It offers functions such as locking, unlocking, muting, and sounding an alarm.

Overview

Advanced Vehicle Security

This car alarm system remote control offers a robust solution for vehicle security and convenience. Designed with long-range sensing capabilities and a dedicated separate receiving unit, it ensures reliable performance for your alarm system. The intuitive four-button interface allows for easy control of locking, unlocking, muting, and alarm activation.
