Product Overview

High-Performance Bass Amplification

This high-performance 1-channel Class D amplifier is engineered specifically for car audio systems, delivering powerful and clean bass for an immersive listening experience. Designed with a robust heat sink for efficient thermal management, it ensures reliable performance even during demanding operation. The unit features adjustable gain control, low-pass filtering, and bass boost capabilities, allowing for precise sound customization to suit any automotive environment.

Technical Specifications

Amplifier Class	Class D
Channels	1

Connectivity & Controls

Terminal Inputs

- +12V
- GND
- REM
- INPUT
- LOWPASS
- GAIN
- FUSE
- SPEAKER

Connectivity Features	RCA Inputs, Speaker Outputs, Adjustable Gain, Low-Pass Filter, Bass Boost
