

Car Audio Power Amplifier

High-performance audio amplifiers designed for car audio systems. These amplifiers deliver clean and powerful sound reproduction, featuring robust construction and efficient heat dissipation.

Overview

High-Performance Car Audio Amplification

These professional-grade audio amplifiers are engineered specifically for high-fidelity car audio systems. Designed to deliver clean, powerful sound reproduction, they feature robust construction and advanced thermal management for efficient heat dissipation. They are the ideal solution for driving subwoofers and full-range speakers in demanding automotive environments.

Best For

Subwoofers, Full-range Speakers, Automotive Audio

Model Variants

Available Models

- PK902
- PK504R
- PK575
- PK4000D

Key Features

Design Highlights

Robust Construction • Efficient Heat Dissipation • Clean Sound Reproduction
