

Car Audio Speaker

This car audio speaker delivers clear audio reproduction for automotive applications. Its durable frame and protective grill ensure stability and longevity.

Product Overview

High-Fidelity Audio Reproduction

This pair of circular car audio speakers is engineered for clear and precise sound performance. Featuring a durable frame construction and an integrated protective grill, these speakers are designed for both longevity and optimal audio output. The exposed driver design highlights the intricate quality of the cone and suspension system, ensuring reliable performance in various automotive audio environments.

Technical Specifications

Key Features

- Protective fine-mesh grill
- Durable frame construction
- High-performance voice coil
- Advanced suspension system

Design Type	Circular Driver
Compatibility	Car Audio Systems, Automotive
