

Car Audio Subwoofer

This high-performance subwoofer is designed for car audio systems. It features a robust cone, durable surround, and powerful motor structure.

Product Overview

High-Performance Car Audio Subwoofer

This subwoofer is engineered for audiophiles seeking enhanced low-frequency response and deep, impactful sound in their vehicle. It features a robust cone for accurate bass reproduction and a powerful motor structure designed to handle high power levels with minimal distortion. Built for longevity, the durable surround ensures consistent performance across a variety of enclosure types.
