

Car DC to AC Power Inverter

This power inverter converts DC power from a car's battery into AC power, suitable for powering electronics while traveling. Its durable aluminum housing ensures heat dissipation and protection.

Product Overview

Reliable Mobile Power Solution

This DC to AC power inverter is designed to transform your vehicle's battery power into usable AC electricity, ensuring your essential electronics stay powered on the road. Encased in a durable aluminum housing, it provides excellent heat dissipation and robust protection during operation. It features a convenient cigarette lighter adapter, making it an ideal choice for charging laptops, smartphones, and other small electronic devices while traveling.

Technical Specifications

Housing Material	Aluminum
Cooling	Passive heat dissipation via aluminum housing

Connectivity

Input Connection	Car cigarette lighter adapter
------------------	-------------------------------

Applications

Supported Devices	Laptops, Smartphones, Small Electronics
-------------------	---
