

Car ISO Wiring Harness for Alpine Head Units

This car ISO wiring harness is designed for connecting to Alpine head units. It simplifies the installation or replacement of car stereos in Alpine-compatible vehicles with its plug-and-play design.

Product Overview

Professional Automotive Audio Connectivity

This high-quality ISO wiring harness is engineered specifically for seamless integration with compatible head units. Featuring a multi-colored wire configuration, it ensures straightforward identification and simplified installation for automotive technicians and DIY enthusiasts alike. The harness provides a reliable, secure plug-and-play solution, effectively streamlining the process of upgrading or replacing car audio systems.

Technical Details

Connector Setup

- Black connector (Head unit side)
- Red and black connector combination (Vehicle side)

Installation Method

Plug-and-Play • ISO Standard

Wire Features

Insulated, Terminated, Multi-colored

Application

Primary Application

Automotive car audio head unit integration
