

Car Multimedia System with Navigation

This car multimedia system supports various disc formats and has a high-sensitivity digital AM/FM radio tuner. It also features simultaneous navigation and music playback, handwriting input, and Bluetooth hands-free connectivity.

Product Overview

Integrated Multimedia & Navigation Experience

This advanced car multimedia system offers a comprehensive driving experience by combining high-definition TFT touch-screen navigation with robust entertainment features. Designed for seamless integration, it supports original steering wheel controls and provides enhanced safety through automatic reversing camera support. Drivers can enjoy high-sensitivity radio, versatile media playback, and intuitive handwriting input to ensure convenience and connectivity on the road.

Core Features

Key Functionalities

- GPS Navigation with voice guidance
- Handwriting input support
- Bluetooth hands-free calling with caller ID
- Automatic reversing camera support
- Original steering wheel control compatibility
- Individual speaker balance control

Supported Media Formats

MP3, MPEG4, WMA, JPEG

Technical Specifications

Radio Performance

36 Channels
Preset Stations

Interfaces

USB, AV Input, Bluetooth

Display & Interface

Intelligent Features

Automatic Light Sensing • Graphical User Interface • Simultaneous Navigation & Music Playback

Display Technology

High-definition TFT color touch-screen
