

# Car Multimedia System with Navigation

This car multimedia system offers versatile entertainment and navigation features. It supports steering wheel control, disc playback, USB, AM/FM radio, Bluetooth, and GPS navigation with handwriting input.

## Overview

### Advanced Multimedia & Navigation System

This high-performance car multimedia system enhances vehicle entertainment and navigation capabilities through a intuitive TFT high-definition touch screen interface. Designed for seamless integration, it supports original steering wheel controls and includes robust connectivity options like Bluetooth hands-free, USB media playback, and precision GPS navigation. The system provides a comprehensive suite of features including voice-guided navigation, automatic reversing camera support, and customizable audio distribution for a superior in-car experience.

## Multimedia & Connectivity

### Connectivity Features

- USB Interface
- AV Input
- Bluetooth Hands-free
- AM/FM Radio (36 Presets)

### Supported Media Formats

MP3, MPEG4, WMA, JPEG

## Navigation & Display

### Navigation Capabilities

- GPS Navigation
- Handwriting Input
- Voice Navigation
- Simultaneous Music and Navigation

### Display Technology

TFT High-Definition Color Touch Screen

## System Integration

### Vehicle Integration Features

Steering Wheel Control • Disc Box Matching • Reverse Camera Support

### System Functions

- Caller ID Display
- Call Record Query
- Automatic Light-Sensing
- Graphical User Interface

### Audio Control Configuration

Independent zone control for front, rear, left, and right speakers
