

Car Multimedia System with Navigation and Touch Screen

This car multimedia system provides navigation, Bluetooth hands-free connectivity, and USB playback. It supports multiple audio and video formats, features a color touch screen, and includes a reversing camera.

Overview

Advanced In-Car Multimedia Experience

This comprehensive car multimedia system integrates navigation, entertainment, and vehicle control into a single, intuitive interface. Featuring a high-definition touch screen, it supports seamless media playback from USB sources, including MP3, MPEG4, WMA, and JPEG files. Designed for safety and convenience, the system includes hands-free Bluetooth, automatic reversing camera support, and steering wheel control integration.

Core Features
