

Car Rear Bumper Diffuser

This car rear bumper diffuser is made of durable plastic or composite. It is designed to mount on the rear bumper to improve aerodynamics and enhance the vehicle's appearance.

Product Overview

Aerodynamic Performance Upgrade

This rear bumper diffuser is engineered to enhance vehicle aerodynamics by managing airflow beneath the car. Its sleek, contoured design provides a sporty aesthetic upgrade while ensuring functional performance. Constructed from durable materials, this component is designed for secure mounting and long-term reliability in automotive applications.

Technical Specifications

Design Characteristics

- Sleek and streamlined profile
- Contoured for airflow management
- Sporty aesthetic enhancement

Color	Black
Material Composition	Durable Plastic, Composite Material

Installation & Compatibility

Mounting System	Integrated mounting points for secure attachment
