

Car Rear-View Mirror with Integrated DVR

This car rear-view mirror features a built-in digital video recorder and a rear-view camera. It offers a clear view of the road behind, enhancing safety while driving and parking.

Overview

Integrated Safety and Recording Solution

This car rear-view DVR mirror provides a dual-function upgrade for vehicle safety and monitoring. By integrating a high-resolution digital video recorder and a rear-view camera directly into the mirror housing, it offers a discreet yet powerful tool for accident evidence and parking assistance. Designed for seamless installation, the system enhances driver visibility and road security without cluttering the dashboard.
