Product Overview

Dual-Function Safety Solution

This innovative car rearview mirror seamlessly integrates a high-definition digital video recorder (DVR) into a standard mirror form factor. Designed for enhanced road safety and security, it captures clear footage of the road ahead while maintaining the essential functionality of a rearview mirror. With features like loop recording, parking monitoring, and collision detection, it provides reliable documentation and peace of mind for professional and personal vehicle use.

Core Features

Key Capabilities

Loop Recording, Parking Monitoring, Collision Detection, Motion Detection, Audio Recording
