Product Overview

High-Performance Carbide Brazed Tips

These U.S. standard saw tips are engineered for superior durability and precision in demanding industrial cutting environments. Manufactured from high-quality cemented carbide, they offer exceptional hardness and wear resistance, making them ideal for both wood and metal processing applications. Their robust design ensures consistent performance and a long operational lifespan for various saw blade configurations.

Technical Specifications

Standard

U.S. Standard

Material

Cemented Carbide

Design

Straight Top

Applications

Suitable Industries

Wood Processing, Metal Processing

Product Range

Available Components

- Saw Tips
- Discs
- Rods
- Rings
- Shaped Tips
