

Carbide Threaded Inserts 16ER8STACME

These carbide threaded inserts are ISO standard and available in various grades and sizes. They are made from 100% new material, ensuring good quality.

Product Overview

Professional Carbide Threaded Inserts

These precision-engineered carbide threaded inserts are designed for superior performance and extended tool life in demanding industrial environments. Manufactured from 100% new high-quality carbide material, they offer exceptional wear and heat resistance to ensure consistent results. The unique geometry facilitates efficient chip evacuation and reduced cutting forces, making them ideal for high-accuracy threading applications.

Technical Details

Item Number	16ER8STACME
Standard Compliance	ISO

Compatibility

Compatible Materials	Steel, Stainless Steel, Cast Iron
----------------------	-----------------------------------
