Product Overview

High-Performance Cutting Solution

This carbide-tipped circular saw blade is engineered specifically for high-precision cutting of aluminum materials. Designed with optimized tooth geometry, it ensures clean, accurate cuts with minimal burr formation while significantly reducing vibration and noise during operation. Its robust construction provides exceptional durability and a long service life, making it a reliable choice for demanding industrial and professional applications.

Technical Capabilities

Performance Features

1 Grade

Precision Ground Teeth

0 Minimized

Burr Formation

Compatible Materials

Aluminum, Wire, Iron, Steel Pipes

Design & Construction

Key Features

- Optimized tooth geometry
- Vibration reduction design
- Noise reduction technology
- Robust construction for durability

Blade Type

Carbide Tipped Circular Saw Blade
