

Carbide Tipped Circular Saw Blade

Circular saw blade features carbide-tipped teeth for enhanced cutting performance and durability. It is designed for woodworking and other cutting applications, providing clean and precise cuts.

Product Overview

High-Performance Cutting Solution

This circular saw blade is engineered with carbide-tipped teeth to deliver enhanced cutting performance and superior durability. Its specialized design ensures efficient material removal, making it an ideal choice for woodworking and various professional cutting applications. The blade's construction promotes clean, precise cuts, helping to maintain high standards of quality in your projects.

Technical Specifications

Blade Type	Carbide Tipped Circular Saw Blade
Finish Color	Red

Features

Key Features	Carbide-Tipped, High Durability, Precision Cutting, Efficient Material Removal
--------------	--

Application

Primary Applications

- Woodworking
- General Cutting Tasks
