

Carbide-Tipped Concrete Drill Bit

This concrete drill bit is designed for deep hole drilling applications. It features a durable carbide tip for efficient material removal and extended life.

Product Overview

High-Performance Drilling Solution

This carbide-tipped concrete drill bit is engineered for deep hole drilling applications in demanding environments. Featuring a robust carbide tip, it ensures efficient material removal and extended tool life. The optimized spiral flute design facilitates rapid debris ejection, preventing clogging and maintaining consistent drilling speed throughout operation.

Technical Specifications

Tip Material	Carbide
Key Design Features	Carbide-tipped, Spiral flute, High-speed debris ejection

Compatibility & Usage

Compatible Drilling Equipment

- Rotary hammer drills

Suitable Materials

Concrete • Brick • Masonry
