

Carbide-Tipped Hammer Drill Bits

High-performance hammer drill bits feature carbide tips and double flutes for efficient drilling. They are suitable for a range of materials and come in various sizes to meet diverse drilling requirements.

Product Overview

High-Performance Carbide-Tipped Hammer Drill Bits

These professional-grade hammer drill bits are engineered with carbide tips and double-flute designs to ensure efficient, clean drilling performance. Manufactured through advanced rolling and milling processes, they are built for durability across a wide range of masonry and concrete applications. With versatile surface treatments and a comprehensive range of sizes, these bits provide reliable solutions for diverse industrial

Technical Specifications

Surface Treatments

Sand-blasted • Galvanized • Chrome-plated

Manufacturing Process

Balled, Milled

Available Diameter Range

30 mm
