

Carbon Brushes for Appliance and Tool Motors

These carbon brushes are designed for use in various domestic appliances and electrical tools. The brushes transfer electrical current to the motor's commutator, ensuring efficient operation.

Product Overview

Reliable Carbon Brushes for Electrical Tools

These replacement carbon brushes are engineered for use in a variety of domestic appliances and electrical tools. Serving as essential components for transferring electrical current to the motor's commutator, they ensure efficient and consistent operation. The durable carbon composition is designed for longevity, while the integrated springs maintain optimal contact pressure to support reliable electrical conductivity and extend the lifespan of your equipment.

Technical Specifications

Item Number	SL-DDGJ-1
Dimensions	7mm x 17mm x 22mm
Primary Application	Electrical Tools, Domestic Appliances
