Product Overview

Infrared Warmth for Animal Care

This carbon fiber infrared insulation lamp is specifically designed to provide essential warmth for young animals. Utilizing advanced carbon fiber heating technology, it ensures efficient and targeted thermal output to promote healthy growth and well-being. Built for durability and reliability, this lamp offers an extended service life, making it an ideal heating solution for farms, shelters, and veterinary environments.

Technical Specifications

Voltage	220 V
Power Output	100 W
Lifespan	8000 hours
Color Temperature	1000 K

Key Features

Heating Technology

Carbon Fiber • Infrared

Best For

Animal Care, Farms, Veterinary Clinics, Shelters
