Product Overview

Innovative Carbon Fiber Heating

This tower-style space heater utilizes advanced infrared carbon fiber heating elements to deliver efficient and rapid warmth. Designed with a sleek, space-saving footprint and a stylish red and grey finish, it fits seamlessly into modern indoor environments. Safety is prioritized through dual overheating protection, including thermal cutoff and incline sensors, ensuring reliable operation for professional and residential settings.

Technical Specifications

Heating Element	Infrared Carbon Fiber
Form Factor	Tower / Vertical
Post-Shutdown Cooling	Yes

Safety Features

Safety Warnings

- Do not touch while in operation
- Automatic 30-second fan run-time after shutdown for heat dissipation

Safety Protections	Thermal Cutoff, Incline Cut-off, Overheating Protection, Protective Mesh Guard
--------------------	--

User Experience

Control Method	Soft Touch, Infrared Remote Control, Top Panel Switches
Operational Noise	Low-noise aluminum propeller
