Overview

Professional Carbon Monoxide Protection

This advanced carbon monoxide detector is designed to provide reliable, real-time monitoring of CO gas concentrations in residential and commercial environments. Featuring a clear digital LCD display, it provides instant readings of CO levels and temperature, while the integrated, long-life CR123A lithium battery ensures extended operation. With built-in safety features like silence mode, self-test capabilities, and clear visual/auditory alerts, this device is engineered to meet EN50291-1 standards for maximum safety and peace of mind.

Technical Specifications

Power Source	DC 3V Lithium Battery (CR123A)
Service Life	10 years
Operating Temperature	0°C to 40°C
Humidity Range	30% - 90% R.H.
Dimensions	110 x 68 x 33 mm

Performance Metrics

Alarm Sound Output

85 dB(A) @ 3m
Sound Output

Current Consumption

Mode	Current
Standby	d10µA
Alarm	d60mA

Compliance & Features

Key Features

- LCD display for CO concentration and temperature
- Silence mode (8 minutes)
- Low battery warning
- End-of-life indication
- Self-test function

Certifications

EN 50291-1:2018
