Overview

Carbon Steel Liquid Transport Solutions

Engineered for durability and efficiency, these carbon steel tank trucks offer a high-strength solution for liquid logistics. Designed with a focus on ease of repair and low maintenance costs, they are suitable for a wide range of fuel and chemical transport requirements. The vehicles incorporate advanced safety features and modern logistics management systems to ensure reliable operation in demanding environments.

Technical Specifications

Available Configurations

- Trailer: 2, 3, 4+ axles
- Rigid Truck: 4x2, 6x4, 8x4

Maximum Capacity	50000 L
Minimum Curb Weight	9200 kg
Capacity Range	2 - 60 CBM

Features & Safety

Safety & Operational Features

- Ground-level fuel hose lifter control
- Customizable dispensing chamber design
- Adjustable ladder positioning
- European ADR standard compliance

Compliance & Approval

ADR Standard

Logistics & Management	GPS Tracking, Content Measurement System (CMS), GSM Signal Transmission
