

Carbon Steel Roasting Pan with Rack

This roasting pan is constructed from heavy-gauge carbon steel, ensuring even heat distribution. It features a non-stick coating and a removable roasting rack for better airflow and crisping.

Product Overview

Professional Carbon Steel Roasting Pan

This heavy-gauge carbon steel roasting pan is engineered for superior heat distribution and durability in demanding kitchen environments. Designed for efficiency, it includes a removable rack to promote optimal airflow for perfectly crisp results on meats and vegetables. The non-stick surface ensures easy food release and cleanup, making it a reliable tool for high-volume roasting tasks.

Technical Specifications

Cleaning

Dishwasher-safe

Material	Heavy-gauge carbon steel
Max Oven Temperature	450 °F

Features

Included Components

- Roasting Pan
- Removable Roasting Rack

Key Benefits	Even Heat Distribution, Non-stick Coating, Enhanced Airflow, Durable Construction
--------------	---

Usage

Ideal Applications

- Roasting Meats
- Poultry Preparation
- Vegetable Roasting
