

Carbon Steel Square Flange Connector

This square flange is available in sizes from 1/2" to 4". It is constructed from carbon steel, including A105(N), C22.8, ST-37.2, and Q235.

Overview

Robust Carbon Steel Square Flange Connector

This carbon steel square flange is engineered for reliable connectivity in demanding hydraulic and pneumatic systems. Featuring a precision-machined central bore with internal threading and a multi-hole mounting pattern, it ensures a secure, leak-proof seal. Its robust construction is designed to withstand high-pressure industrial environments, making it an essential component for critical piping infrastructure.

Technical Details

| | |
|-----------------|------------------------------|
| Material | Carbon Steel |
| Shape | Square |
| Connection Type | Internal Threaded Bore |
| Mounting Holes | Multi-hole perimeter pattern |

Applications

| | |
|--------------------|---|
| Compatible Systems | Hydraulic Systems, Pneumatic Systems, Industrial Piping |
