

# Carbon Zinc Battery

This carbon zinc battery is suitable for low-drain devices. It provides reliable power for everyday use.

## Product Overview

### Reliable Power for Low-Drain Devices

These Super Heavy Duty carbon-zinc batteries are engineered to provide consistent and reliable power for everyday low-drain applications. Designed with an emphasis on environmental responsibility, they are manufactured without the use of mercury or cadmium. This makes them an ideal choice for professional buyers seeking dependable, eco-friendly energy solutions for a wide range of standard electronic devices.

## Technical Specifications

Battery Chemistry	Carbon-zinc
Model	ZPG-704B
Compliance & Standards	Mercury-free, Cadmium-free, Green Technology

## Production Capabilities

### Annual Production Capacity

**1 Billion units**

Battery Output

**6 Billion sets**

Accessories Output

### Global Market Presence

- Southeast Asia
- Middle East
- Africa
- Europe
- Americas
