

Carbonized Bamboo Flooring with Random Knot Pattern

This carbonized bamboo flooring features a horizontal grain and a matte finish. The random knot pattern adds a unique, organic aesthetic to any room.

Product Overview

Natural Aesthetic and Durability

This carbonized bamboo flooring features a distinct random knot pattern, offering a unique and organic aesthetic for modern interiors. The horizontal plank construction provides a warm, honey-toned appearance with a sophisticated matte finish that enhances natural wood grains. Designed for versatility, this flooring reflects ambient light to brighten living spaces while maintaining a durable surface suitable for residential or commercial applications.
