Product Overview

High-Performance Maintenance Solution

This professional-grade carburetor cleaner is designed to restore engine performance by effectively removing stubborn carbon, pectin, and hydrocarbon deposits. It is safe for use on oxygen sensors and catalytic converters, helping to stabilize engine idle, reduce exhaust emissions, and improve fuel efficiency. Suitable for both carburetors and fuel injection systems, it serves as an indispensable maintenance agent for various mechanical parts.

Technical Specifications

Compatibility & Safety

- Safe for oxygen sensors
- Safe for catalytic devices
- Non-foaming formula
- Protects against rust
- Lubricates moving parts

Certifications

ISO 9001, ISO 14001

Shelf Life

3 Years

Usage Instructions

Application Steps

Step	Action
1	Remove air filter and ensure engine is off
2	Shake can for 1-2 minutes
3	Insert extension tube into nozzle
4	Spray into carburetor while engine is running at 5000+ rpm

Recommended Maintenance Interval

Every 5000-7000km

Safety & Storage

Storage Requirements

- Store below 40°C
- Keep upright
- Keep away from heat and open flames
- Do not store in vehicle

Flammable

Yes
