

Carburetor for Mazda NA B1600

This carburetor is designed for Mazda NA B1600 engines. It delivers the optimal air-fuel mixture needed for improved engine performance and fuel efficiency.

Product Overview

High-Performance Carburetor Solution

This high-performance carburetor is specifically engineered for Mazda NA B1600 engines, designed to deliver an optimal air-fuel mixture for improved engine efficiency and power output. Built with durable materials and precise calibration, it ensures reliable operation and is an ideal choice for replacing worn or damaged units. The design prioritizes easy installation and restores original engine performance standards.

Compatibility & Identification

Part Number	1942-13-600
Compatible Vehicle	Mazda NA B1600

Technical Details

Engineered Markings	215282-62, 42 4 C8
