Product Overview

Automated Box Forming Solution

This one-piece folder box forming machine is engineered to streamline packaging operations by automating the box assembly process. It efficiently picks cardboard blanks from a storage tray, shapes them using a precision punch, and secures the edges with hot melt glue. Designed for high-volume environments, this equipment ensures consistent box formation and structural integrity while significantly reducing manual labor.

Performance & Capacity

Forming Capacity

10 boxes/min

Boxes per Minute

Applicable Carton Size Range L150-350 x W150-300 x H26-65 mm

Feed Material One-piece folder cardboard

Technical Requirements

Power Supply Single-phase 220-240V/110-120V (customizable)

Power Consumption 1.5 kW

Compressed Air Pressure 6.5 bar

Air Consumption 100 NL/min

Physical Specifications

Dimensions (L x W x H) 1900 x 1400 x 700 mm
