Overview

Automated Wrap Box Forming

This one-piece cardboard wrap box former is designed to streamline packaging operations by automatically picking die-cut cardboard blanks from a storage tray. The machine precisely shapes, folds, and seals the edges using hot melt glue, ensuring consistent box formation. Engineered for high-volume production, this equipment offers reliable performance and adjustable settings to accommodate various carton sizes.

Performance Metrics

Forming Capacity

10 boxes/min

Boxes per Minute

Applicable Carton Size

L150-350 x W150-300 x H26-65 mm

Technical Requirements

Power Supply	Single-phase 220-240V/110-120V (customizable)
Power Consumption	1.5 kW
Compressed Air Pressure	6.5 bar
Air Consumption	100 NL/min

Physical Specifications

Machine Dimensions	L1900 x W1400 x H700 mm
Compatible Materials	One-piece die-cut cardboard
