

Cargo Transport Motorcycle with Flatbed

This three-wheeled motorcycle is designed for transporting cargo. It features a flatbed cargo area with side rails, a robust frame, and a single-cylinder engine.

Overview

Versatile Cargo Transport Solution

This three-wheeled motorcycle is engineered specifically for heavy-duty cargo transport in commercial and industrial environments. Featuring a robust frame and a spacious flatbed cargo area with side rails, it offers reliable performance for demanding working conditions. The vehicle combines durability with essential functionality, including a comfortable seating arrangement and a dependable suspension system.
