

Cargo Transport Tricycle

This is a tricycle designed for cargo transport. It features a sturdy frame, a seat for the driver, and an open engine compartment.

Overview

Robust Cargo Solution

This three-wheeled cargo tricycle is engineered for reliable transport of goods in demanding environments. Featuring a sturdy, reinforced frame and a versatile rear flatbed with metal siding, it provides a stable platform for various load types. Equipped with essential safety features including headlights and rearview mirrors, it is a practical choice for efficient short-haul logistics.
