

# Cargo Transport Tricycle

This tricycle is designed for transporting cargo. It features a rear metal cargo bed and a motorcycle-style front end.

## Product Overview

### Rugged Cargo Transport Tricycle

This three-wheeled transport vehicle is engineered for efficient short-distance cargo hauling in urban or industrial environments. Combining a robust motorcycle-style front end with a spacious flat-bed rear cargo area, it offers excellent maneuverability and utility for various logistics tasks. Its reliable engine and durable metal frame construction ensure long-lasting performance for daily heavy-duty use.

## Technical Specifications

### Lighting System

- Dual front headlights
- Chrome fender integrated

### Vehicle Configuration

Three-wheeled, Motorcycle-style controls, Rear cargo bed

### Cargo Bed Design

Flat bottom metal frame

## Performance

### Application

Short-distance hauling • Logistics • Urban Transport
