

Cargo Transportation Tricycle with Air-Cooled Engine

This tricycle is engineered for cargo transportation, featuring a robust design. It is equipped with a single-cylinder, air-cooled engine, providing reliable power for hauling goods.

Overview

Robust Cargo Solution

The DY110ZH is a robust three-wheeled motorcycle specifically engineered for reliable cargo transportation. Featuring a sturdy cargo bed and a reinforced frame, this vehicle is built to handle heavy loads across various applications including delivery services, agricultural transport, and construction material handling. Its compact design ensures excellent maneuverability in tight spaces, while the durable suspension system guarantees long-lasting performance.

Technical Specifications

Engine Type	Single-cylinder, air-cooled
Transmission	Manual
Braking System	Drum brakes

Design & Construction

Chassis Material	Steel
Key Features	Reinforced Frame, Durable Suspension, Compact Design, Cargo Bed

Applications

Suitable Applications

- Delivery services
- Agricultural transport
- Construction material handling
