

Cargo Tricycle with Flatbed

This tricycle is designed for transporting cargo. It features a flatbed in the rear supported by two wheels, and a motorcycle-style front end.

Overview

Robust Cargo Solutions

The Cargo Tricycle with Flatbed is engineered for efficient goods transport in dense urban or industrial environments. Featuring a stable three-wheel design and a spacious rear flatbed, it provides a balance of maneuverability and load-bearing capacity. Its motorcycle-style front end ensures intuitive handling and high visibility for the operator.

Technical Specifications

Safety and Operation

- Integrated headlight for visibility
- Ergonomic handlebar steering
- High-capacity flatbed utility

Design Configuration

Three-wheel design, Motorcycle-style controls, Flatbed cargo layout
