

Cargo Tricycle with Motorcycle-Style Front End

This tricycle is equipped with a rear cargo bed, suitable for transporting various items. It features a motorcycle-style front end, complete with a headlight and visible suspension components.

Product Overview

Rugged Cargo Transportation Solution

This cargo tricycle features a robust motorcycle-style front end designed for maneuverability and efficient load management. Engineered with a durable metal frame and a dedicated rear cargo bed, it is built to handle various transport requirements in demanding work environments. The combination of exposed mechanical components and a reinforced cargo structure ensures reliability and ease of maintenance for professional operators.

Technical Specifications

Engine Displacement

150 cc

Displacement
