

Carriage Bolt with Round Head and Square Shoulder

This carriage bolt features a round head and a square shoulder. The design prevents rotation after installation, making it suitable for fastening wood or metal.

Product Overview

Professional Grade Carriage Bolts

These carriage bolts are engineered for secure fastening in both wood and metal applications. Featuring a distinctive round head and a square shoulder, they are specifically designed to prevent rotation once installed, ensuring a stable connection. Their design offers a clean, flush finish that is also tamper-resistant, making them an ideal choice for reliable, long-term structural assembly.

Technical Details

Head Style	Round Head
Anti-Rotation Mechanism	Yes
Shoulder Type	Square Shoulder
Material	Metal

Application

Suitable Materials

- Wood
- Metal

Key Benefits

Tamper-resistant • Flush finish • Prevents rotation
