

# Cash Register POS Terminal with LCD Display

This point-of-sale terminal combines the functionalities of a traditional cash register with modern POS capabilities. It features an integrated LCD display for transaction viewing and reporting.

## Product Overview

### Professional POS Terminal Solution

This POS terminal is designed for public-facing environments, featuring a robust yellow enclosure and a reliable handset for voice communication. It includes an integrated LCD display for clear information readout and a standard numerical keypad for intuitive operation. Equipped with a dedicated card slot, it is optimized for secure payment processing and public service applications.
