Product Overview

Industrial Cashew Shelling Solution

This cashew shell cracker machine is engineered for the efficient removal of hard shells from raw cashew nuts. The system utilizes a specialized shelling roller and vibrating screen mechanism to process nuts of varying sizes. Designed to improve processing efficiency and reduce manual labor, it is an essential component for automated cashew production lines.

Technical Specifications

Core Components

- Shelling roller
- Vibrating screen

Operational Features

Adjustable shelling gap, Multi-size nut processing, Single-grade shelling

Service & Support

After-Sales Service

The machine includes a one-year warranty covering defects in design or manufacturing. Lifelong maintenance support is provided. Technical support is available for operational issues, though repairs resulting from human factors are the responsibility of the user.

Warranty Period

1 year
