

Cassette Recorder Component

This product is a component for a cassette recorder. The gray plastic enclosure features a rectangular opening with a textured interior and a small circular opening on one side.

Product Overview

Component Overview

This cassette recorder component is designed as a primary housing unit, featuring a durable gray plastic enclosure. The top side includes a precision-engineered rectangular opening with a textured interior surface, ideal for integration into audio electronics. This component is essential for manufacturers and repair technicians looking for high-quality housing parts for vintage or legacy audio equipment.

Physical Properties

Material	Plastic
