

Cast Iron Agricultural Harvester Roller

This durable cast iron roller is designed for agricultural harvesting machinery. Its robust construction ensures smooth and efficient rolling, contributing to the effective operation of harvesting equipment.

Overview

Robust Agricultural Rolling Solution

This Cast Iron Agricultural Harvester Roller is engineered for high-performance harvesting applications. Its heavy-duty construction is designed to withstand harsh operating conditions and heavy loads while ensuring smooth and efficient rotation. Precision-engineered for longevity, this roller assembly provides reliable performance in demanding field environments.

Technical Specifications

Primary Application

Agricultural Machinery • Harvesting Equipment

Assembly Configuration

- Four robust cast iron wheels
- Arranged in pairs on either side of central axle
- Bearing-mounted wheels
- Secured with nuts and bolts

Material

Cast Iron

Performance Features

Key Benefits

Heavy-Duty, Precision-Engineered, Smooth Rotation, High Load Capacity, Field Reliable

Installation

Mounting Type

Central axle mounting point for machinery frame attachment
