

Cast Iron Crane Rope Sheave Wheel

This cast iron sheave is designed for crane rope applications. It features a robust construction for reliable performance in demanding lifting operations, ensuring smooth and efficient rope guidance.

Product Overview

High-Performance Crane Sheave

This cast iron crane rope sheave is engineered for demanding lifting operations, providing robust construction and reliable performance. Its precision-engineered design ensures smooth rope guidance and optimal support, which significantly minimizes wear and extends the lifespan of both the sheave and the rope. Suitable for various crane types and configurations, it is a critical component for enhancing the safety and effectiveness of crane systems.

Technical Features

Key Performance Metrics

251 ID

Model Reference

4132

Part Series

Identification Codes

HT0103, 3002K, 60105, 41322001

Design & Construction

Design Characteristics

- Grooved outer diameter for rope guidance
- Multiple mounting holes for secure attachment
- Precision-engineered rope support
- Robust heavy-duty construction

Material

Cast Iron

Applications

Primary Applications

Crane Systems • Lifting Operations • Rope Guidance • Industrial Rigging
