Product Overview

SG8E Series Deep Well Pump

The SG8E series is a robust and efficient 8-inch deep well pump engineered for demanding water extraction applications. Constructed from durable cast iron with a corrosion-resistant coating, it ensures longevity and reliable performance even in harsh environments. Its multi-stage design provides high head capabilities, making it an ideal solution for agricultural, industrial, and municipal water supply systems.

Technical Specifications

Pump Diameter	8 inch
Construction Material	Cast Iron
Key Features	Multi-stage Design, Corrosion-Resistant Coating, Stainless Steel Intake Screen

Performance

Performance Highlights

8 inch

Applications

Recommended Use Cases

- Agricultural water supply
- Industrial water extraction
- Municipal water systems
- Deep well applications
