

Cast Iron Flanged Wye Strainer

Cast iron flanged wye strainers are engineered for industrial applications, effectively removing debris from pipelines. These strainers protect pumps, meters, control valves, and other process equipment, and are suitable for use with water, oil, and gas.

Product Overview

Industrial Filtration Solution

This cast iron flanged wye strainer is engineered for robust industrial filtration, effectively removing debris from pipeline systems. By protecting critical components like pumps, meters, and control valves, it ensures the longevity and reliability of your process equipment. The flanged connection design facilitates straightforward installation and simplifies routine maintenance procedures.

Technical Specifications

Strainer Design

Wye Strainer

Material	Cast Iron
Connection Type	Flanged
Compatible Fluids	Water, Oil, Gas

Application & Benefits

Key Benefits

- Protects pumps and meters from debris
- Extends service life of control valves
- Easy installation via flanged connections
- Simplifies pipeline maintenance
